Mobile UV System (USA)      AVT-MUVS1-USA  
Mobile UV System (International)      AVT-MUVS1-INTL

## Mobile UV System (MUVS)

The Mobile UV System (MUVS) is designed to help sanitize and sterilize facilities using UV-C light to kill bacteria and inactivate viruses. The portable design of the Mobile UV System is based on larger devices used by hospital operating rooms that offer air and surface sterilization through the use of Germicidal UV (GUV) lamps. Users simply move the Mobile UV System to a room that has been thoroughly cleaned, set the timer based on the dimensions of the room, and the Mobile UV System helps to disinfect the air and surfaces once the user vacates the room. There is no additional training or certification needed to operate the Mobile UV System.

Applications for the Mobile UV System include classrooms, laboratories, waiting rooms, patient rooms, offices, and more. UV-C light is FDA-approved to help sterilize and disinfect surfaces, and is proven to have a 99.9% effectiveness in killing microbes.

- Suitable for use in Hospitals, Hotels, Schools, Nursing Homes, Dental Practices, Doctors Offices, Gyms, Retail Stores, Day Care Centers, Restaurants and more.
- Mobile UV Systems are stackable to increase coverage in enclosed areas.
- Sterilizes a 20ft x 15ft room in approximately 10 minutes.
- Comes equipped with casters for easy portability, 24' power cord, on/off switch with 2 minute delay, timer and carry handle.
- Unit measures 20" x 20" x 24" (500mm x 500mm x 540mm). Weight is 26 lbs (12kg).
- Three year warranty included.
