

Room Alert Manager

IT & Facilities Environment Monitoring Made Easy

Advanced Software For Discovery, Management, Logging, Graphing, Alerting & More

Room Alert Manager is AVTECH's local software solution for Room Alert management, alerting, reporting, graphing and more.

Room Alert Manager software is a free download for all Room Alert users on the Professional Tier and higher and offers a wide range of features including:

- User-friendly interface
- Multiple threshold alerts
- Customized alert durations
- Firmware updates across the network
- Hardware groupings for easier management
- User hierarchies

For Room Alert users in industries that require local software management solutions for security or data privacy purposes, Room Alert Manager is the optimal choice for facility protection against environmental downtime.

Room Alert Manager includes powerful features that allow users to send alert notifications when issues or events are detected by their Room Alert monitors and sensors. Room Alert Manager allows for unlimited alerting of customizable alert and alert clear notifications to individuals and groups, hierarchies, dependencies and scheduling. It also allows for Actions on Alert/Alert clear conditions such as toggling Signal Tower LEDs, Send Web URL requests and more. All this is possible through a single installation, with no rules and no agents.

The screenshot shows the Device Inventory table in the Room Alert Manager interface. The table lists discovered devices with their status, name, model, IP address, last discovered time, and firmware version.

| Discovery Status | Device Name | Model | IP Address | Last Discovered | Firmware Version |
|------------------|--------------|-------|----------------|-----------------------|------------------|
| Discovered | RA125-7001C6 | RA125 | 192.168.44.9 | 1:31:39 PM 11/19/2020 | 1.2.1 |
| Discovered | RA325-70005D | RA325 | 192.168.44.232 | 1:31:39 PM 11/19/2020 | 1.2.1 |
| Discovered | RA325-XXXXXX | RA325 | 192.168.44.152 | 1:31:39 PM 11/19/2020 | 1.2.1 |
| Discovered | Supp 55 125 | RA125 | 192.168.55.167 | 1:31:39 PM 11/19/2020 | 1.2.3 |
| Discovered | RA325-XXXXXX | RA325 | 192.168.44.172 | 1:31:39 PM 11/19/2020 | 1.2.1 |
| Discovered | RA325-E00019 | RA325 | 192.168.66.158 | 1:31:39 PM 11/19/2020 | 1.2.1 |

Ideal for managing multiple deployments or single units, Room Alert Manager also allows users to take automatic actions to resolve issues, automatically log sensor data in an embedded SQL database for one click export, view graphed data over a user-specified amount of time with the ability to toggle between graph and sensor displays, monitor alert status for multiple units, set monitoring thresholds, set multiple IP addresses, securely update firmware and more. Users can categorize devices based on their own custom criteria, so users can group devices by type, location, or any other metric that allows easier device management.

Room Alert Manager offers the perfect complimentary software platform to AVTECH's products, making it easier for users with multiple Room Alert devices to monitor and document environment conditions, improve reliability, and decrease unplanned downtime as part of their business continuity plan.
